Cairo, Egypt | Military Status: Currently Serving

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in **ASP.NET Core**, **.NET Core**, **C#**, **SQL Server**, and **Angular**, with experience building scalable web applications and **RESTful APIs**. **ECPC Finalist (4 times)** with strong problem-solving and competitive programming skills. Experienced in mentoring university students through technical sessions within the ICPC community. Seeking to contribute to a dynamic software engineering team by developing efficient, high-performance full-stack solutions.

PROFESSIONAL EXPERIENCE

Scale AI, Competitive Programming AI Trainer

07/2023 – 10/2023 | Remote, USA

- Solved complex algorithmic and data-structure challenges to evaluate and improve generative AI models.
- Completed 67+ advanced coding tasks with 100% accuracy, ensuring high-quality training data for AI systems.
- Developed and executed automated and manual test cases to evaluate model responses and improve validation coverage.
- Identified edge cases, logical errors, and performance issues to enhance model reliability and reduce error rates.
- Collaborated with distributed engineering teams to enhance AI evaluation workflows and problem-solving benchmarks.

PROJECTS

Virtual E-Commerce, ASP.NET Core | Entity Framework | SQL Server | RESTful APIs

- Developed a scalable backend system for an e-commerce platform using **ASP.NET Core** and **Entity Framework**.
- Implemented **JWT authentication** and role-based authorization using **ASP.NET Identity**.
- Built core e-commerce features including shopping cart, order management, and product feedback systems.
- Designed and implemented **RESTful APIs** for products, users, orders, shopping carts, and feedback.
- Integrated **SQL Server** database for secure and efficient data management.

GitHub: <https://github.com/Shady-Mo/E-Commerce>

HR Management System (HRMS), ASP.NET MVC | SQL Server | JavaScript | Stripe Payment Integration

- Developed a web-based Human Resource Management System using the **ASP.NET MVC** architecture.
- Implemented secure user authentication and role-based authorization using **ASP.NET Identity**.
- Built responsive user interfaces using **HTML**, **CSS**, **JavaScript**, and **Razor Views**.
- Designed backend logic for managing HR operations including employees, payroll, and administrative workflows.
- Integrated **Stripe payment gateway** to support secure payroll and service transactions.

GitHub: <https://github.com/Shady-Mo/HRMS-DEPI>

Tiny Programming Language Compiler, C++ | Compiler Design | Parsing | Data Structures

- Designed and implemented a **tiny programming language compiler** to understand core principles of compiler construction.
- Built components for **lexical analysis** and **syntax parsing**, converting source code into structured representations.
- Implemented grammar rules and expression evaluation using **data structures and algorithms** in C++.
- Developed parsing logic to analyze program statements, identifiers, expressions, and control structures.
- Strengthened understanding of **compiler design** concepts, including tokenization, parsing, and syntax validation.

SKILLS

Programming Languages: C#, C++, C, Python, JavaScript, SQL, Java

Backend Development: ASP.NET Core, .NET Core, ASP.NET MVC, Entity Framework, LINQ

Frontend Development: HTML, CSS, JavaScript, Angular, Bootstrap, Tailwind CSS, jQuery

Databases: SQL Server

Tools & Technologies: Git, GitHub, RESTful APIs, JWT Authentication, Stripe Payment

Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Programming (OOP), Problem Solving

EDUCATION

9-Month Professional Diploma in Web Development,

10/2025 – Present

Information Technology Institute (ITI)

Track: Professional Web Development and BI-Infused CRM

Bachelor of Computer Science, Benha University

10/2021 – 07/2025 | Benha, Egypt

GPA: 3.67 / 4.00 (Very Good)

Graduation Project: Virtual Try-On E-Commerce System for clothing visualization — Grade: Excellent

AWARDS

ECPC Finalist (4 times), Egyptian Collegiate Programming Contest (ECPC)

Competitive programming contest focused on algorithms, data structures, and advanced problem solving.

LANGUAGES

Arabic: Native

English: Professional Proficiency
